

# 2021 IES NSW Lighting Design Award of Commendation | Woodriff Lane

STEENSEN VARMING

A creative and imaginative solution was developed with a series of over-sized lampshades installed to the existing light and pole infrastructure. Sparking curiosity, the over-sized lamp shades are playful, catching your attention and drawing you to the space. Reminiscent of an outdoor lounge room, combined with the revitalised public seating elements and trees, Woodriff lane is transformed to a place to gather and linger during both the day and night.
